LIVESTOCK HEALTH REQUIREMENTS

Monmouth Fair's objective is to provide the spectating public with an extraordinary agricultural experience.

All animals regardless of age, size, or breed must be appropriate for public display. Monmouth Fair officials will make all final determinations on the acceptable condition of individual livestock for exhibition.

All Animals – Domestic animals or livestock offered for show or exhibition at any fair shall be free from any signs of infectious or contagious disease, including but not limited to ringworm, external parasites, foot rot, or shipping fever. Animals showing signs of dehydration, are gaunt, thin, lame, injured, or are not cleaned & groomed may not be exhibited. Monmouth Fair may utilize a licensed veterinarian to assist in health evaluations.

All livestock and poultry originating outside of the State of Maine must meet the requirements for entry into the State. An Official Certificate of Veterinary Inspection (OCVI) is required to import cattle, sheep, goats, swine, hatching eggs, and poultry. Equines must have an official certificate of negative Coggins test within 12 months. For details contact the DACF Animal Health office at 207-287-3701.

Failure to comply with these State regulations & Monmouth Fair standards will require removing the animal/s from the grounds immediately.

In spite of efforts by the Department of Agriculture, the Monmouth Fair officials, and the expertise of exhibitors the potential for exposure to disease exists. Therefore it is strongly recommended that exhibitors protect their flocks and herds by (1) appropriate vaccinations of show stock against contagious diseases under the supervision of a veterinarian and (2) an isolation period before re-introduction to the home flock, band, or herd.

In addition to the general requirements the following specific requirements will be enforced:

Cattle – warts will be classified as an infectious disease. Cattle from all counties may show without Brucellosis or tuberculin tests, providing the herd is not under quarantine. It is recommended that all show cattle, including 4-H, be vaccinated against I.B.R., P.1.3., and B.V.D.

Horses – The Commissioner shall require a negative Coggin's test, taken within 36 months, on all horses raced, exhibited or stabled on race tracks or fairgrounds where other horses are being raced, exhibited or stabled. Absolutely no horse will be permitted to show without proof of a negative Coggin's test and such reports shall be available for inspection by an agent of the Commissioner of Agriculture upon request. Failure to furnish such reports shall exclude equines from the events.

Monmouth Fair strongly recommends that all equine for exhibition or competition be vaccinated for EEE, WNV & Rabies.

Swine – Although not required, it is recommended that Swine originating from Maine shall be from a Certified Brucellosis Free Herd.

All Swine must be permanently identified.

Poultry – All poultry shall originate from flocks that have an official Pullorum-typhoid clean rating.

Sheep & Goats - All sheep and goats must have a USDA approved identification: ear tag, tattoo or microchip for registered animals, to exhibit.
